

Registration Event for OneMatch

A person's best chance of finding a matching donor is within their own ethnic group. Therefore, donors from as many ethnic communities as possible are needed to develop a database with a broad ethnic representation that reflects the needs of all patients.

How can you help?

Join today if you are between 17 and 50 years of age, in good general health and willing to donate to any patient in need.

Each year, hundreds of Canadians are in need of stem cell transplants to treat potentially life-threatening illnesses. Fewer than 30% of patients will find a compatible donor from a family member, 70% rely on the generosity of an unrelated donor for available sources of stem cells. Many unfortunately fall into this group and to survive, they must receive a stem cell transplant as do the more than 800 other patients in Canada.

You can be the one match to save a life.
